

AQUANOMIX

WATER RE-USE SOLUTIONS

LEADERSHIP & EXPERTISE IN WATER REUSE

Water is this century's biggest crisis. Aquanomix supports efforts to not only educate, but to develop proven solutions to in the face of global water scarcity. Being sustainable is more than an environmental gesture. It makes long-term sense.

Aquanomix is driving water conservation, operational cost savings, and supporting regulatory compliance in even the most challenging locations through rainwater and storm water harvesting and grey water reuse.

WHY CHOOSE AQUANOMIX WE KNOW WATER

- Experts in water reuse dedicated to your project from design through installation, and beyond
 - More than 50 years of experience in industrial water management and engineering
 - Team of LEED® accredited engineers
 - 300+ sales engineers throughout North America
 - Partnerships with USGBC, ASHRAE, AWT
-
- Comprehensive + customized turnkey solutions in implementing water reuse technology
 - Can be retrofitted into existing buildings or incorporated into new building design
 - Typical payback for evaporative cooling projects is less than 5 years
 - Helps to achieve up to 12 points towards LEED® certification

AQUANOMIX

WATER RE-USE SOLUTIONS

OUR HARDWARE

A proven, state-of-the-art system for water reclamation. Pre-wired. Pre-piped. Factory commissioned prior to shipping to project site including hydrostatic testing, full I/O point check to support sequence of operations as designed. Industry's best-in-class pumping and treatment systems.

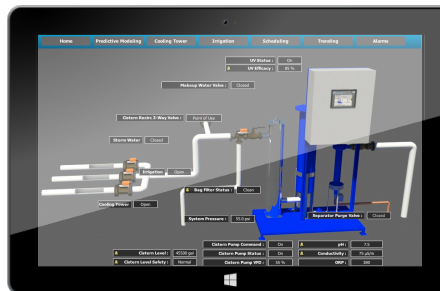

WATER QUALITY DATA

Delivers real-time water quality data in order to condition water for its intended purpose. Qualitative and quantitative data includes water submetering, pH, ORP, conductivity. Helps to protect and preserve capital assets installed downstream of system, such as chiller plant equipment, plumbing fixtures, and irrigation systems.

OUR CONTROLS

Controls framework seamlessly integrates with BMS. Compatible with BacNet, LON, Foundation Fieldbus. Functionality includes weather data from NWS. Collect and view all system data with 7x24 access through Windows-based tablet and remote VPN.
